

There are two basic types of BW35 transmissions used for non-USA production. Type 1 is primarily used for European vehicles produced from 1963-75. Type 2 was primarily used in Asian vehicles from 1969-72. From 1969 on, however, intermix did occur. For example, the 1969-70 Datsun used either type. Also, Type 2 uses a modulator and Type 1 does not.
