RJ = Rocker Joint (Triangular shaped Pins, Chain Stays in "Dog-Bone" Shape)
 RP = Round Pin (Circular Shaped Pins, Chain Can Roll into a "Ball")

* Do not interchange or substitute these chains with each other. The **272888T** is a "random pitch" design that when used in the wrong application causes a "moan" or "boom" noise from the vehicle driveline during operation. The **272888V** is a "straight pitch" design and there causes a "whistling" or "whinning" noise when used in the wrong application.
